

```

let fs = require("fs");
console.log("Before");
let f1FileReadP = fs.promises.readFile("f1.txt");
f1FileReadP
    .then(function cb(content) {
        console.log("content" + content);
        return fs.promises.readFile("f2.txt")
    })
    .then(
        function cb1(content) {
            console.log("content" + content);
            return fs.promises.readFile("f3.txt", cb2);
        }
    )
    .then(
        function cb2(content) {
            console.log("content" + content);
        }
    )

```

Dry run of reading 3 files using Promises
